

# Facts about me...the Giant Pacific Octopus

I am a highly intelligent ocean animal. I can learn to open jars and solve puzzles. I can even recognize faces.

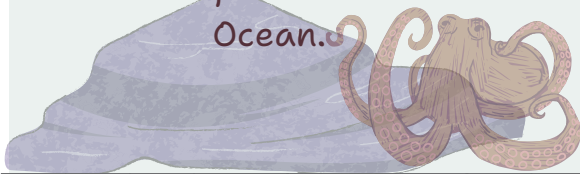

I like to eat mostly crabs, clams, lobster, shrimp and small fish

I am reddish brown in color and you can find me in shallow waters, as well as in waters over 4000 feet deep in the Pacific Ocean.

Did you know I taste by touching? I have 8 arms and EACH arm can have up to **250** suckers. These help me grip, taste and smell.
